Forecast For West Midlands
Issued by Met Office Exeter
at 0400 on Tuesday 19 Jan 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Persistent heavy rain in the north, turning widespread later.

Today:
A windy day throughout, with persistent heavy rain in the north of the region through the morning, turning widespread in the afternoon. Heaviest in northern parts, especially over high ground. Flooding risk in the north and east of the region. Maximum temperature 11 deg C (52 deg F).

Tonight:
This evening, rain will clear, allowing some a short dry spell before heavy showers sweep across the region into the night. These will be heaviest in northernmost and southernmost areas. Minimum temperature 8 deg C (46 deg F).

Wednesday:
The day commences with heavy, sometimes torrential, outbreaks of rain across northern and central areas, with persistent rain to the south, heavy at times. Easing by night, turning largely dry. Maximum temperature 11 deg C (52 deg F).

Outlook for Thursday to Saturday:
Drier and colder conditions on Thursday through to Friday, with the odd shower, yet clear spells at times. Largely dry Saturday morning, before widespread rain towards the afternoon.
